Medication holding cup

The medication holding cup incorporates a wafer thin metallic membrane with micro holes. Vibration of this membrane acts like a pump converting the liquid drug into a fine aerosol of particles small enough to penetrate the lower airways.

Flexineb™

Flexineb™ is the fast, portable equine nebuliser, utilising Nortev proprietary technology to efficiently deliver aerosolised medication directly to the lungs.

Portable and Silent

- Single charge gives in excess of 3 hours operation
- Easy to use; no wires, hoses or awkward valves
- Silent, instant aerosol production

Comfortable and Lightweight

- Flexible material ensures a good seal and comfortable fit
- Adjustable exit valve allows full control enabling the care giver to bypass the valve when not in use
- Quick and easy to put on
- Non-invasive
- **Weighs just 1kg**

Unique and Adaptable

- Unparalleled delivery method
- Automatic switch off
- Compatible with Metered Dose Inhalers (MDI)
- Colour option for alternative therapies, e.g. blue for drug administration, green for natural therapies
- Available in Foal size

Robust and Compact

Self contained system includes:

- Medication holding cup with extension
- Aerosol chamber with MDI adaptor
- Controller with rechargeable lithium ion battery

Supplied with:

- AC/DC power supply
- User manual
- Rigid carrying and storage box

Applications

- Allows treatment of respiratory problems diagnosed by professional veterinarians
- Also can be used to condition the airways in preparation for competition
- Delivers medication direct to the lungs
- Potential drug savings and shorter withdrawal periods
- Clear dirty noses, manage dry coughs, treat dust allergies and pneumonia

Medications

Designed to aerosolise wide range of drugs and natural therapies:

- Antibiotics for infections
- Corticosteroids for inflammation
- Bronchodilators to open the airways
- Mucolytics to break down mucous
- Standard medication cup accommodates 10mls
- 20mls extension provided to administer volumes up to 30mls
- Adaptor for use with MDI inhalers

From the horse's mouth...

Elaine Tragett, Eventer

"Just four days into using the HAYGAIN® to steam his hay and the Flexineb™ on my horse and the symptoms of his allergy are totally gone! The difference is amazing and so quick... thank you!"

Sinead Halpin, Eventer

"We have used this product religiously leading up to the biggest four star in the world.

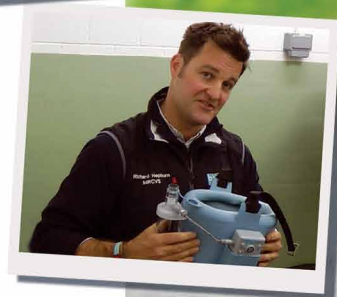

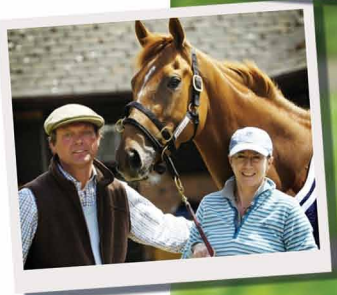

I can say, for the first time in two years, and at the biggest, fastest, longest track of his career Tate did not bleed."

Maureen Haggas, Racehorse Trainer

"We use the Flexineb™ on a regular basis and find it a very effective piece of equipment for horses with respiratory problems."

Richard Hepburn, Veterinarian, BVSc DipACVIM MS CertEM(IntMed) MRCVS ACVIM

"The most important aspects about Flexineb™ is the fact it is self-contained, very easy to use and tolerated brilliantly by horses so you're unlikely to get treatment failure with such a simple and effective product."
